Lead Technical Product Manager

I am a seasoned Technical Product Manager with extensive experience in the technology industry. My expertise in driving product development, building consensus on priorities, and integrating usability studies and market analysis into product requirements has resulted in products that consistently exceed user satisfaction. I've led cross-functional teams developing automation solutions which reduced on-boarding time from 60 hours to under 10 minutes resulting in an annual cost savings of \$4.5M.

I am confident that my experience and skills make me an ideal candidate for the Product Manager ML Platform position.

WORK EXPERIENCE

84.51 Kroger

Lead Technical Product Manager • 01/2019 – 03/2023

- Developed and managed portfolio roadmaps, OKRs and KPIs across 6 offerings and 2 value streams.
- Led development of IaC and CaC automation suite leveraging Databricks API, resulting in 60% reduction in setup time, workspace consistency and cost savings benefits.
- Hands on experience in development and data science insights discovery utilizing container based deployment in Kubernetes environments.
- Led development of a managed ML orchestration product, resulting in a 70% increase in adoption and the deprecation of legacy technology and a savings of \$8.5M annually.
- Extensive experience working with a Data Science/Machine Learning stack, including Python, Jupyter, Scikit-Learn, TensorFlow, Keras, PyTorch, and Transformer based LLM.
- Experience building custom analytics dashboards in common BI tools as well as Dash, and Shiny to enable data-driven insights.
- Strong experience with internal and external enterprise stakeholder management and partner development.

Astronomer Head Of Product • 04/2017 – 01/2019

- Worked closely with Sales to develop a prioritized integration roadmap, resulting in a 12% annual reduction in customer attrition.
- Demonstrated expertise in driving product growth, increasing daily active users by 23%, total task executions per customer by 43%.
- Achieved a 38% increase in total customer task execution KPIs, contributing to a 12% increase in SaaS annual recurring revenue (ARR).

Technical Project Manager • 06/2013 – 04/2017

- Managed and developed partner API integrations roadmap and offerings, resulting in 38% quarterly increase in partner adoption.
- Oversaw technical implementation of API and SSO integrations with external partners.
- Aided QA in test case review, asset creation, A/B testing, and stakeholder demonstrations.
